WORK EXPERIENCE

Audio-Visual Technician — **August. 2021 – Present**
Kellogg Hotel and Conference Center — *East Lansing, MI*
- Worked within a team environment and collaborated when setting and monitoring AV equipment for clients, while also ensuring that everything ran smoothly without issue.
- Communicated with clients and provided technical support with a wide array of AV and general technical equipment such as laptops.
- Problem-solved issues and repaired any equipment that wasn't working as intended in a timely manner.

PROJECTS

MSU Majors | *JavaScript/HTML/CSS, jQuery | https://msumajors.com*
- Static website for Michigan State University that pulls together career and academic information for all the majors and puts it in one easy-to-read location.
- Created to assist current students with finding information about their majors, while also being a great tool for incoming students to browse and learn about the different majors and career paths effortlessly.

Personal Website/Portfolio | *React, PaperCSS | https://asecco.github.io*
- My personal portfolio website showcasing who I am and the projects I've completed.
- Created from the ground up with responsive design principles in mind and hosted publicly on GitHub with documentation to allow other developers to use as a template and build upon.

IP Location Lookup | *Python, PyQt5, OOP | https://github.com/asecco/ip-location-lookup*
- Program that allows you to search an IP address and retrieve the corresponding information such as geolocation, ISP provider, and VPN status via an API request.
- Used Object-Oriented Programming concepts and the PyQt5 toolkit to build a simple yet efficient GUI for displaying the requested data.
